PROFESSIONAL SUMMARY

Final year B.Tech student in Artificial Intelligence and Data Science with strong expertise in Frontend Development using ReactJS, JavaScript, HTML, and CSS and Mobile app Development. Experienced in building responsive, user-centric web and mobile applications with modern UI/UX practices using Agile methodologies. Passionate about creating scalable and interactive interfaces, and eager to contribute to real-world projects through opportunities.

EDUCATION

B.Tech – Artificial Intelligence & Data Science	M.Kumarasamy College of Engineering, Karur	Oct 2023 – Present	GPA: 7.27
Higher Secondary Education (12th)	Vidya Mandir School	May 2022 – May 2023	

TECHNICAL SKILLS

Frontend	ReactJS (Vite), HTML, CSS, JavaScript
Languages	JavaScript (Intermediate), Python (Basic), Java, SQL (Intermediate)
Build Tools	Firebase, VS Code, Hostinger, Netlify, Git, GitHub, Vercel
Backend / AI	FastAPI, RAG, Gemini AI, Claude AI, PHP, PostgreSQL, Node.js, MongoDB, REST APIs
Soft Skills	Problem Solving, Strong Communication, Teamwork, Accountability, Time Management

PROJECTS

FRSChatbot — AI-Powered RAG Chatbot | github.com/harish200522/frschatbot

React (Vite), FastAPI, Python, Claude AI, SentenceTransformers

- Built a chatbot converting FRS documents into an interactive query system using Retrieval-Augmented Generation (RAG), reducing document search time by 60% and eliminating hallucination by grounding every response in source documents.
- Developed responsive React frontend with stateful and stateless components; integrated FastAPI backend with SentenceTransformers for semantic document retrieval with 90%+ accuracy.
- Implemented reusable component architecture for scalable UI development, improving code maintainability by 40%.

POS – Mobile Application (Point of Sale) | <https://github.com/harish200522/POS-System>

React 18, Vite, MUI, Node.js, MongoDB, Capacitor (Android), JWT, PWA

- CounterCraft POS is a full-stack retail system with real-time barcode scanning, automated inventory tracking, and secure multi-user role management supporting 3+ user roles.
- Features a UPI payment gateway with QR code generation, reducing payment processing time by 50%; implemented offline-first mobile support with native Android integration and automated data sync with thermal printing.

INOUT Fashion Catalogue – Full Stack Web App | <https://github.com/harish200522/catalogue>

React, Node.js, PostgreSQL (Neon), Cloudinary, REST APIs

- Developed a full-stack catalogue website for a real wholesale fashion client handling 100+ product listings using React and Node.js.
- Integrated PostgreSQL (Neon) and Cloudinary for product and image management.
- Deployed frontend on Netlify and backend on Hostinger with proper CORS and environment variable configuration.
- Built REST APIs with complete CRUD operations and handled production configurations.

EXPERIENCE

Cloud Computing Intern — ZYLO TECH

July 2025

- Deployed and managed applications across cloud platforms.
- Reduced deployment time by 30% using automation scripts; gained hands-on experience with cloud infrastructure tools supporting scalability.

CERTIFICATIONS

NPTEL — Ethical Hacking (2024)

NPTEL — Industry 4.0 and Internet of Things (2024)

IBM Cognitive Class — Data Science Tools (2024)

IBM Cognitive Class — Data Analytics with Python (2024)

IBM Cognitive Class — SQL and Relational Databases 101 (2024) IBM Cognitive Class — Statistics 101 (2024)

AWARDS & ACTIVITIES

- 4th place in a college Hackathon — rapid prototyping and problem-solving under time constraints.
- Coordinator of the Fine Arts Club — managed event planning and cross-team collaboration for 200+ students.
- Event Organizer — planned and executed cultural programs, fostering campus engagement.
